CITY MANAGER'S REPORT

Capital Projects

- Browns Addition Boating Access Site- The boat launch project is winding down for the year with Midwest Construction wrapping up the winterization of the site. This includes removing any items that could pose a safety risk to residents and staff who utilize the facility for ice fishing. A final balancing change order, which will contain a number of cost reducing items, is expected to be submitted in December.
- EGLE TMF Grant- UP Environmental is over halfway done with our service line investigations per our EGLE grant. The 2018 EGLE lead and copper rule requirements mandate that the City verifies the service line material at four locations along the service. This record keeping is comprised of the material at the main, the public line connection to the valve, private line connection to the valve, and finally the material where it enters the private structure. The City needs to verify the service line material at the public and private connections to valve at roughly 330 parcels with the EGLE grant covering roughly 230 parcels. This information will be used in our upcoming EGLE Drinking Water Revolving Loan program application to replace galvanized service lines materials once identified. This work is being done to meet EGLE requirements and is not a result of elevated lead and copper sampling results.
- Tourist Park Bathroom- Cross Construction will begin working on the bathroom building rehabilitation in the next week. The progress schedule for the project has them slated to complete the removals of existing items such as stall dividers and plumbing fixtures that will be replaced in the Spring. City staff will be working with the contractor to facilitate access to the facility over the next few weeks with an expected winter pause occurring in late December. The contractor has expressed a desire to have all demolitions and removals completed prior to this pause with the rehabilitation items being completed in April and May of 2025.
- <u>Bayshore Wellhouse</u> The City, UPEA, and Olsen and Olsen construction continue to work towards beginning the construction project as UPPCO service lines continue to slow progress. The electrical subcontractor is currently reviewing the existing power service location and will be working with engineering staff and UPPCO to correct the issue.

Administrative Items

- The auditors for the City of Munising were onsite for two weeks in November to perform documentation reviews. Our draft audit should be completed in early December with finalization and submittal to the State occurring late this month. Once the auditors are able to schedule the audit presentation, we will communicate the date to the City Commission.
- I will be out of the office for my quarterly Michigan Municipal League Workers Compensation Fund board of directors meeting in Midland on Thursday and Friday of this week.
- D. New Business
